Profile Summary

Highly motivated Bachelor of Master of Computer Applications (MCA) student with expertise in Python, HTML-CSS and JavaScript. Eager to leverage technical skills and collaborative spirit to contribute to a challenging role in the technology field, identifying solutions and driving operational improvements within a cross-functional team.

EDUCATION

Master of Computer Applications (MCA)
Galgotias University

2025 - 2027
Greater Noida, UP, India

Bachelor of Computer Applications (BCA)
University of Allahabad,

2022 - 2025
Prayagraj, UP, India

Intermediate
MPVM Ganga Gurukulam

2022
Prayagraj, UP, India

High School
MPVM Ganga Gurukulam

2020
Prayagraj, UP, India

SKILLS SUMMARY

- **Languages:** Python, JavaScript
- **Tools:** Excel, PowerPoint
- **Database:** MongoDB, MySQL
- **Platforms:** Kaggle, Jupyter Notebook, Visual Studio Code
- **Soft Skills:** Rapport Building, People Management, Excellent communication

CERTIFICATES

Web Dev with HTML CSS & JS | Data Flair | [LINK](#)

- Designed and developed responsive user interfaces using semantic markup and modern layout techniques.
- Implemented interactive features through DOM manipulation, event handling, etc.

Basic Python Certificate | HackerRank | [LINK](#)

- Successfully cleared Python (Basic) certification assessment, demonstrating core programming skills.
- Validated expertise in Python fundamentals including data types, conditional logic, loops, and functions

INTERNSHIPS

Python Programming Internship | YBI | [LINK](#)

June 24- July 24

- Learned and implemented various Python libraries, enhancing coding proficiency.
- Worked on real-world Python projects, gaining hands-on experience in data processing and automation.
- Collaborated with peers to solve programming challenges and optimize code performance.
- Completed a structured learning program, strengthening foundational and advanced Python concepts.

PROJECTS

Price Tracker Platform

React.js | Node.js | MongoDB | TypeScript | Web Scraping

- Built a full-stack web application that tracks price changes of products in real-time.
- Implemented custom web scraping logic in Node.js and stored historical data in MongoDB.
- Designed responsive product pages in React, displaying price history using interactive charts.

Flip Card Memory Game

HTML | CSS | JavaScript

- Developed an interactive card-matching game where players test their memory skills.
- Implemented logic for tracking matched pairs and flipping cards with animation.
